The school modified the program, offering learning objectives, learning packs, and the ability to complete coursework at one's own pace (with teachers always available). From Wikipedia This example is from Wikipedia and may be reused under a CC BY-SA license. Mastery learning has little to do with specific content, but rather is a description of the process of mastering particular learning objectives. From Wikipedia and may be reused under a CC BY-SA license. It addresses how the content of a course is designed; identifies the learner's needs; and how the learning objectives will be achieved. From Wikipedia and may be reused under a CC BY-SA license. These examples are from corpora and from sources on the web. Any opinions in the examples do not represent the opinion of the Cambridge University Press or its licensors. According to the OED, the definitions for subjective and objective are as follows: Subjective: adjective Based on or influenced by personal feelings, tastes, or opinions. When something is subjective, it is based on a person's opinion. For example, movie ratings are subjective because they are based on the individual's opinion of the movie. Objective: adjective adjective (of a person or their judgement) not influenced by personal feelings or opinions in considering and representing facts. When something is objective, it is based on facts. Based on these definitions, clearly, the use of subjective in the original sentence is incorrect. The admission process requires some amount of luck and so it is subjective. It is possible that the writer meant to say that because the admissions process is based on luck, each person's experience may vary, however, it is difficult to know for certain. How To Use Objective In A Sentence? And he believed in the value of his prayers and in the objective reality of their influence. So the meaning of the distinction between subjective impressions and the objective truth is clear. He recognizes repeatedly the impersonal and purely objective conditions from the standpoint of moral science. It simply chooses its objective and flies to it, practically in a straight line. The Germans had lost interest, for they seemed likely to reach their objective in other ways. The preceding figure shows this system in a fairly powerful objective (Fig. 18). Hegel, instead of finishing, now goes on to the field of what he calls Objective is that which appertains to the subject, and objective is that which appertains to the object. An objective science which consists merely of facts without any subjective theories is inconceivable. Here it seems advisable to leave the track of an objective system and to turn to the physical world. The book is a simple, objective presentation of the subject as opposed to a formal and mathematical one. The objective existence as the resulting movement. In language, articulate sounds are generally employed as objective signs attached to objects with which they have no natural tie. He is connected with the objective signs attached to object signs attached to a bisolutely constitute an absolutely and his mind goes to work upon these. certain and objective science, how is it with the rest of the sciences? Their main objective of marketers online is to reduce interactivity, shorten consideration and induce impulsive purchases. The mind, self-possessed and sure of itself or free, is so only through the objective shape which its main development runs parallel with. My personal impression may be that the {115} earth is round. The theory of Objective shape which its main development runs parallel with. section of the theory of Objective Mind describes a state of affairs in which this antithesis is explicitly overcome. Materially the principle involves the difference of objective probation according as it goes with or without the factor of absolute certification which lies in confession. Its justification is that it protests against the authority of a mere external or objective order, subsisting and ruling in separation from the subjectivity. Saxe had 40,000 men in action and 24,000 around Tournai, which town was the objective of the English advance. Their objective point was Wendell City, and to reach this they had to make a detour that would take them through a picturesque part of the country. The very first objective of the explorers was to locate a suitable site for fortification, in order that further explorations might be conducted from a secure base. Short & Simple Example Sentence For Objective or inherent. Is there, in fact, any objective science? The German objective farthest west is now clear. Of or relating to a material object, actual existence or reality. | Not influenced by the emotions or prejudices. | Based on observed facts. On this page we are showing correct ways to write : Objective in a sentence Objective sentence sentence with Objective Objective used in a sentence of Objective make sentence with Objective make sentence of Objective Adjective Sentence of Objective Adjective Sentence of Objective as possible and let the report speak for itself Success will depend on objective criteria and visualizing the process. The primary objective is to achieve best practice in long term interoperability between its systems. The varied traditions up to this stage cannot be regarded as objective history. Certainly not
pure empiricism, or habits of objective reality offers an optimistic glimpse of the future of religion. It thus represented a subjective creation, not an objective fact. The objective ground on which he bases his system is the religious experience of the Christian community. The safest thing for both of them was for him to keep his distance and remain objective. In the new German Empire it is too completely overshadowed by Prussia to have any objective importance by itself. presupposes the existence of objective truth. pro formas where objective spirit to the execution of the laws until such time as he had gradually gained the confidence of the nation. Dutreuil de Rhins and Fernand Grenard, both Frenchmen, left Cherchen, with Lhasa as their objective. de Heredia, mosaistes who have at heart the cult of antique and pagan beauty, of "pure art" and of "objective poetry." It might appear, therefore, that sensible things had an objective existence in the mind of God; that an idea so soon as it passes out of our consciousness passes into that of God. An objective and non-party application of the laws, and equal rights for all nationalities, were in consequence the ever-recurring heads of their programme. Dale's Atonement (1875), the special point of which is that the death of Christ is not required by the personal demand of God to be propitiated, but by the necessity of honouring an ideal law of righteousness; thus, " the death of Christ is the objective ground on which the human race was condemned. Therefore, in general terms, scepticism may be summarily defined as a thorough-going impeachment of man's power to know - a denial of the possibility of objective method of proceeding from being to thinking. He leaves it undetermined whether or not our knowledge of sense things, which is never entirely presentative, involves some reference to this objective course of nature or thought of the divine mind. Further, holding that, " like every other perception, the perception, the perception of a human body immediately involves the existence of that body," and, like Fichte, believing in a " common consciousness," he concludes that the evidence of sense is verined by " common consciousness " of the external world as objective in the Kantian sense of universally valid. Accordingly, his final conclusion is that " existence - the absolute - is known to us in feeling," and " the external changes are symbolized as motion, because that is the mode of feeling into which all others are translated when objective considered: objective consideration being the attitude of looking at the phenomena, whereas subjective factors without dualism From Reid he adopted the belief in an external world beyond sensation, from Biran the explanation of personality by will, from Schelling the identification of all reason," which he supposed to be identification of all reason," which he supposed to be identification of all reason," which he supposed to be identification of all reason, "which he supposed to be identification of all reason," which he supposed to be identification of all reason, "which he supposed to be identification of all reason," which he supposed to be identification of all reason, "which he supposed to be identification of all reason," which he supposed to be identification of all reason, "whic objective of the various contending armies and was occupied almost continuously by a succession of ill-disciplined mercenary forces whose depredations, accentuated at times by religious fanaticism, reduced the country to a state of helpless misery. collaboration with our Link partners. He too could attempt nothing more than to take up as objective an attitude as possible above parties. At present the belief in an objective atonement is still widely held; whether in the form of penal theories - the old forensic view that the death of Christ atones by paying the penalty of man's sin - or in the form of governmental theories; that the Passion fulfilled a necessity of divine government by expressing and vindicating God's righteousness. But there is also a widespread inclination to minimize, ignore or deny the objective aspect of the atonement, the effect of the death of Christ on God's attitude towards men; and to follow the moral theories in emphasizing the subjective aspect of the atonement, the influence of the Passion on man. Under the pseudonym George Taylor he wrote several historical romances, especially Antinous (1880), which quickly ran through five editions, and is the story of a soul "which courted death because the objective restraints of faith had been lost." south of Meh Puak, which was selected as the terminus for the time being, the continuation to Chieng Mai, the original objective, being postponed pending the construction of another and still valuable, particularly on account of its copious citations from the sources; Neander (Allgemeine Geschichte der christlichen Religion and Kirche, 1825 ff., Eng. Moreover, the arguments by which Heraclitus supported this theory of the universal flux are employed by Protagoras to undermine the possibility of objective flux, or law of change constituting the reality of things, is abandoned, and subjective points of sense alone remain - which is tantamount to eliminating the real from human knowledge. All real connexion or relation, therefore, and with it all possibility of an objective system, disappears; it is, in fact, excluded by Hume ab initio, for " the mind never perceives any real connexion among distinct existences." The real "objective" to which our thoughts must show conformity is not a world of things in themselves, but the system of thiligs as it exists for a perfect intelligence. Columbia, his first objective, was reached on the 17th of February 1865. Quiros returned to Europe, and, obtaining command of a fleet, made a voyage in 1605-1607 during which he observed some of the Paumotu and Society Islands, and later discovered the small Duff group of the Santa Cruz Islands, passing thence to the main island of the New Hebrides, which he hailed as his objective, the southern continent. The post - Aristotelian philosophy in all its branches makes withdrawal from the objective world its starting-point. The theoretical side of inner nature in its successive grades from sensation to the highest form of spirit, the abstracting reason which receives and objective. The subjective mechanism of association which with Berkeley is but part of the true explanation, and is dependent on the objective realization in the divine mind, has been received as in itself a satisfactory theory. War against Turkey was resolved upon, and Azov, the chief Turkish fortress in those regions, which could be approached by water from Moscow, became the Russian objective. The work is considered too subjective and fanciful, the great fault of the author being that he lacks the impartiality of objective existence as separate from subjective existence, but anti-realism in denying that objective existence is to be known. In his Principles of Psychology he twice quotes his point that " what we are conscious of as properties of matter, even down to its weight and resistance, are but subjective affections produced by objective agencies which are unknown and unknowable." Similarly, both in First Principles and in the Principles of Psychology, he assigns to us, in addition to our definite consciousness of something which resists, of something out of consciousness, of something which resists, of some to exist, persist, resist and cause our subjective affections or phenomena, yet not to think or to will. sweet, red - and refer them as accidents to matter in space, which, though mental, is objective, because its production is grounded on a law of all reason. Thus the complete metaphysical idealism of Fichte's Wissenschaftslehre formed out of the incomplete metaphysical idealism of Kant's Kritik, is the theor y on its epistemological side that the Ego posits the non-Ego as a thing in itself, and yet as only a thing existing for it as its own noumenon, and on its metaphysical side that in consequence all reality is the Ego and its own determinations, which are objective, or valid for all, as determinations, not of you or of me, but of the consciousness common to all of us, the pure or absolute Ego. With this powerful instrument of dialective, ideal and real, and yet is the identity of both - an identity of opposites, as Schelling had said Nothing could be more like Hume than his final statement that what we are conscious of is subjective affections produced by objective affections
produced by objective agencies unknown and unknowable. The crusaders, whose objective affections produced by objective had been Egypt, were persuaded to set their course for Constantinople, before which they appeared in June 1203, proclaiming the emperor Alexius IV. collimator objective (e), which is constructed in the manner of a portrait lens in order to give a sharp field of sufficient diameter to include the entire solar image. in diameter on the collimator objective, as its focal length is 60 in. The rays, rendered parallel by the collimator objective, meet a plane mirror (f) of silvered glass, which reflects them to the prisms (g, g'). After being deviated 180° from the original direction, the dispersed rays fall on the camera objective (h), which is exactly similar to the collimator objective conception of nature - the advance, in other words, to Naturphilosophie; (2) the definite formulation of that which implicitly, as Schelling claims, was involved in the idea of Naturphilosophie, viz. The practical, again, taken in conjunction with the theoretical, forces on the question of the reconciliation between the free conscious organization of the apparently necessitated and unconscious mechanism of the objective world. art and genius, the subjective and objective and objective, more individual; Arany was more objective and national. But there are two tests of a more objective character that may be used - orthography, and indication of lacunae or other faults in his exemplar. His objective is the minimum of change. He maintained that the physical and the psychical are two orders which are parallel without interference; that the physical or objective order is merely phenomena, or groups of feelings, or " objects," while the psychical or subjective order is both a stream of feelings, or, as he came to call them, " ejects "; that, if we accept the doctrine of evolution at all, we must carry these ejective streams of feelings through the whole organic world and beyond it to the inorganic world, as a " quasimental fact "; that at bottom both orders, the physical phenomena and the psychical streams, are reducible to feelings; and that therefore there is no reason against supposing that they are made out of the same " mind-stuff," which is the thing-initself. And it is objective, not subjective, reason. One way of receiving a stereoscopic impression through a microscope is by fixing an apparatus as directly as possible above the last lens of the microscopic objective, which divides the rays passing out and directs half into each eyepiece. 48), essentially a Wheatstone pseudoscope, added just above the objective. 49) in a setting is placed above the last surface of the objective and divides the exit rays. The group of rays coming from the right half of the objective is reflected twice in the prism and directed to the left eye. overall objective is to develop the Cost Calculator to incorporate unit costs for all services that children receive within specific time frames. But, although characterized by learning and acuteness, as well as by considerable breadth of spiritual sympathy, it cannot be said to have been accepted by Catholics themselves as embodying an accurate objective view of the actual doctrine of their church. c. It is the synthesis of ideas into unity and consciousness of their objective validity, not in the sense of the logical necessity of their synthesis (Sigwart). It requires no reference to reality beyond the sensible pressure, because it is merely a belief that this exists without inference of the external stimulus or any inference at all: not all judgment then requires the reference of subjective to objective supposed by Locke, is obvious from their attribution to the structure of mind' and from their correlation with immanent principles of the objective order. Syllogism must indeed be objective, i.e. Its universals have objective validity, though this does not involve direct real reference. While man must confront nature from the human and largely the practical standpoint, yet his control is achieved only by the increasing recognition of objective controls. The Molucca Islands being, at that time, the principal objective of European traders, and the route followed by - Magellan's ships being frequently used, Borneo was often touched at during the remainder of the 16th century, and trade relations with Brunei were successfully established by the Portuguese. Guided by this objective criterion, and safeguarded by growing insight into the author's plastic aim, we need not despair of reaching large agreement as to the nature of the sources lying behind the first half of Acts. Krauss's main attack was a straight drive through the Italian lines in the Plezzo basin, his first objective the Saga defile. Governor Jackson thereupon sought to attain his ends by intrigue, and the national arsenal at St Louis became the objective moved from Nashville upon General Braxton Bragg, who left the winter quarters he had established at Murfreesboro and met the Union army on Stone river immediately north of Murfreesboro, on the last day of December. Julius holds that this sole fact robs of objective reality almost all the features of the sun, An al ou. Next is related an event in which we may again see a subjective experience given under the form of an objective reality. But if this construction is to be truly objective, i.e. The UK is edging ever closer to the government's objective for 60% voting turnout at shareholder meetings. The objective should have been Lyons. In its origin this system was a perfectly honest attempt to widen the sphere of obedience by making morality wholly objective and independent of the vagaries of the individual conscience. Peirce for the theories which make chance an objective factor in the process of the Universe. Pleasure is nothing objective and objective measurable: it is simply feeling pleased. It is still impossible to take a purely objective view of Oscar objective, producing the religions of nature; (2) the subjective, God as comprehended in the individual mind; (3) God as Absolute Spirit. In the same way Dr Edward Caird \$ recognizes three similar stages: (I) objective consciousness, the divine in nature; He holds that nothing exists except presentations, which are not merely sensational, and have an objective aspect no less than a subjective. The pamphlet begins by re-stating with reference to sight the general theory that perception of an objective world rests upon an instinctive causal postulation, which even when it misleads still remains to haunt us (instead of being, like errors of reason, open to extirpation by evidence), and proceeds to deal with physiological colour, i.e. The earlier differs from the later exposition in allowing an objective causal relation between thought and extension, for which there is substituted in the Ethics the idea of a thoroughgoing parallelism. Thus the Swedish forces were diverted from their real objective causal relation between thought and extension, for which there is substituted in the Ethics the idea of a thoroughgoing parallelism. have been comparatively unprofitable. Between these extreme examples stands the ordinary photographic objective: the portrait objective is corrected more with regard to the field of view. This is, at the present day, the ordinary type, e.g., of telescope objective (fig. During the heat of summer voyages to the North Cape are suitable, and during the spring and autumn to the Mediterranean, but in the colder months of the year the West Indies, India, Cape Town, Australia or New Zealand forms the best objective and objective in their scope. Expeditions to the Brazilian frontier or to the Chiquitos missions are fitted out here, and it is the objective of the war was Macedonia, as von der Goltz had foreseen in 1909 when he increased both the present and the potential strength of the Turkish forces allotted to that theatre. Greece for her part had a minor objective in Epirus - a region of which the northern limit was vague - and as a major objective salonika and the Aegean littoral beyond, not to mention more remote objects in Asia Minor. The first objective was the old Turkish frontier fortress of Scutari, situated at the point where the Drinasa river flows into Lake Scutari, and consisting only of a castle and a few field-works on the hills surrounding the town. The village became thereafter a storehouse of provisions and munitions of war, and hence became the objective of the British expedition that on the 19th of April 1775 opened with the armed conflict at Lexington the American War of Independence. Colour itself is not objective; it is found not in the ultimate plenum and vacuum, but only in derived objects according to their physical gualities and relations. Fort Pitt was one of the important objective points of Pontiac's conspiracy (1763), and as soon as the intentions of the Indians became evident Captain Simeon Ecuyer, the Swiss officer in command of the garrison (which then numbered about 330), had the houses outside the ramparts levelled and prepared for a siege. The distinction between mind viewed as a succession of "states of consciousness" and the further aspect of mind which philosophy considers was very clearly put by Croom Robertson, who also made a happy suggestion of two terms to designate the double point of view: "We may view knowledge as mere subjective fact, or is such as is named (in different circumstances) real, valid, true. These conditions are the conditions of knowledge as such, or, as it may be put, of objective consciousness of a world of objects and through them consciousness be treated in this objective fashion, then we pass naturally from epistemology to metaphysics or ontology. In the case of a beautiful object the resultant pleasure borrows its specific guality from the presence of determinations essentially objective in their nature, though not reducible to the categories of
science. Unless, indeed, we conceive our faculties to be constructed on some arbitrary plan which puts them out of relation to the facts with which they have to deal, we have a prima facie right to treat beauty as an objective in their nature. determination of things. For, if the members of a natural kind had no common idea to unite them, scientific research, having nothing objective in view, could at best afford a Aoyos or definition of the appropriate particulars; and, as the discrimination of the One and the Good implied the progression of particulars towards perfection, such a Xbyos or definition could have only a temporary value. Like a law of nature, objective in the world, it gives order and regularity to the movement of things, and makes the system rational.3 The failure of Heraclitus to free himself entirely from the physical hypotheses of earlier times prevented his speculation from influencing his successors. Again it is described as proceeding from God as the principle of creation and objective to Him. But it represents the former of the world, as the power or spirit of God, active alike in the physical, the intellectual, and the ethical domain, and apparently objective to God. If, then, there is objective truth at all, the existence of real facts must be made known to us otherwise than through the logical faculty of thought; and, as the regress from conclusion to premises must depend upon something not itself capable of logical grounding, mediate truth. These principles of reason, cause and substance, given thus psychologically, enable us to pass beyond the limits of the relative and subjective to objective and absolute reality, - enable us, in a word, to pass from psychology, or the science of knowledge, to ontology or the science of knowledge, to ontology or the science of knowledge. to bring on at will certain abnormal nervous conditions favourable to the seeing of those visions and the dreaming of those dreams which are supposed to give the soul direct access to the objective realities of the spiritual world. With Anselm Ritschl takes Abelard, who explains the Atonement simply by God's love, and thus is the forerunner of " moral " or " subjective " modern theories as Anselm is of the " objective " or " forensic " theory. He was present at Princeton; was chiefly responsible for the mistake in attacking the "Chew House" at Germantown; urged New York as the objective of the campaign of 1778; served with efficiencylat Monmouth and at Yorktown; and after the surrender of Cornwallis was promoted major-general, and served as a commissioner on the exchange of prisoners. Hume argues that custom is a sufficient practical explanation of this gradual enlargement of our objective reality, The cognizable by reason no less than the relations of Cambridge space or number; and he endeavours to refute moralists, Hobbism - which he treats as a " novantique philo- C d sophy," a mere revival of the relativism of Protagoras - chiefly by the following argumentum ad hominem. He argues that Hobbes's atomic materialism involves the conception of an objective physical world, the object not of passive sense that varies from man to man, but of the active intellect that is the same in all; there is therefore, he urges, an inconsistency in refusing to admit a similar exercise of intellect that is the same in all; there is therefore, he urges, and an objective world of right and wrong, which the mind by its normal activity clearly apprehends as such. It might either fall back on the moral principles commonly accepted, and, affirming their objective validity, endeavour to exhibit them as a coherent and complete set of ultimate ethical truths; or it might take the utility or conduciveness to pleasure, to which these sentiments. might be judged and corrected. While right and wrong, in Price's view, are " real objective qualities " of actions, moral " beauty and deformity " are subjective ideas; representing feelings which are partly the necessary effects of the perceptions of right and wrong in rational beings as such, partly due to an " implanted sense " or varying emotional susceptibility. The fourth, again, is the merely formal principle that " right and wrong must be the same to all in all circumstances," which belongs equally to all systems of objective morality; while the fifth prescribes the religious duty of " veneration or submission to God." He holds, however, that this conscientious effort is self-deceived and futile, is even the very root of moral evil, except it attains its realization in harmony with the objective social relations in which the individual finds himself placed. The materials for it were rapidly accumulated by the use of an objective prism, that is, of a prism placed in front of, instead of behind the object-lens, by which means the spectra of all the stars in the field, to the number often of many score, imprinted themselves simultaneously on the sensitive plate. In philosophy Buridan was a rationalist, and followed Occam in denying all objective); the latter, according as the receptive or the spontaneous element predominates, into cognition and volition. It is in those two functions that the real life of the ego is manifested, but behind them is self-consciousness permanently present, which is always both subjective and objective - consciousness of ourselves and of the non-ego. As regards Christian theology it is not its business to formulate and establish a system of objective truth, but simply to present in a clear and connected form a given body of Christian faith as the contents of the Christian consciousness. In Germany many of the followers of Kant have in greater or less degree maintained the view that all true knowledge depends upon the observation of objective phenomena. Having thus determined what really is and what actually happens, our philosopher proceeds next to explain synthetically the objective semblance (der objective semblance) that results from these. But the contradiction here is one we cannot eliminate by the method of relations, because it does not involve anything real; and in fact as a necessary outcome of an "intelligible" form, the fiction of continuity is valid for the "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 - I. But "objective semblance," and no more to be discarded than say -1 more evidently than space, implicates the contradictory conception of continuity, and cannot, therefore, be a real predicate, though valid as an intelligible form and necessary to the comprehension of the selfpreservations that actually occur when reals meet. But in all this it has been assumed that we are spectators of the objective semblance; it remains to make good this assumption, or, in other words, to show the possibility of knowledge; this is the problem of what Herbart terms Eidolology, and forms the transition from metaphysic to psychology. It is true that in certain texts (especially metrical, texts) certaic traces of case-endings are to be met with, as, for example Deus and Deu, amors and emperador; but, since these forms are used convertibly, the nominative form when the word is in the objective, and the accusative form, when the subject, we can only reaognize in these cases a c nfused recollection of the Provenal rules known only to the litCrte but of which the transcripts took no account. Some nominative formsDis (anciently Dios, and in the Castilian of the Jews Dlo), Cdrias, Mdrcos, sastre (s a r t 0 r) have been adopted instead of forms derived from the accusative, but the vulgar Latin of the Peninsula in no instance presents two forms (subjective and objective and objective) projects a real enlarged image, which occupies the same place relatively to the second system (the eyepiece or ocular) as does the real object in the simple microscope. An image is therefore projected by the object in the same way as a simple microscope, and the front focus of the compound system being situated before the front focus of the objective, the magnification due to the simple microscope of equal magnification. The convenient and rapid change in the magnification obtained by changing the eyepiece or the
objective is also a special advantage of the compound form. In the commonest compound microscopes, which consist of two positive systems, a real magnified image is produced by the objective. In that case, however, in the compound microscope a small object may always be represented by means of wider pencils, one of the foci of the objective (not of the collective system) being near it. The development of the compound microscope essentially depends on the improvement was made in its construction in the two centuries following the discovery. From 1830 onwards many improvement of the miscroscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound microscope objective; but no distinct improvement of the compound m these may be best followed from a discussion of the faults of the image. 13, the objective L1 forms a real magnified image O'Oi'; the objective L1 forms a real magnified image O'Oi'; the objective L1 forms a real magnified image O'Oi'; the objective L1 forms a real magnified image O'Oi'; the objective L1 forms a real magnified image O'Oi'; the objective L1 forms a real magnified image O'Oi'; the objective L1 forms a real magnified image O'Oi'; the objective L1 forms a real magnified image O'Oi'; the object OO l must therefore lie somewhat in front of the faults of the image. magnification M is also altered. This change is usually effected by mounting the objective and eyepiece on two telescoping tubes, so that by drawing apart or pushing in the tube length is increased or diminished at will. When forming an image by a microscope objective it often happens that the transparent media bounding the system have different optical properties. A series of objectives with short focal lengths are available, which permit the placing of a liquid between the cover-slip and the front lens of the objective; such lenses are known as " immersion systems." Nothing is altered as to objective magnification, however, as the first surface is plane, and the employment of the immersion means that the value of fl' is unaltered. If we assume that a normal eye observes the image from the real image produced by the objective. In this case the optical tube length equals the distance of the adjacent focal planes of the two systems, which equals the distance of the image-side focus of the objective F 1 ' from the objective F 1 ' from the objective F 1 ' from the objective magnification of the evenies then with the optical tube-length and with the diminution of the focal lengths of objective and evepiece. 13) is inverted, the objective L 1 tracing from the objective L 1 tracing from the objective L 2 L 3 maintaining this arrangement. 14, the real image O'0' 1, and the evepiece L 2 L 3 maintaining this arrangement. 14, the real image formed by the objective must fall on the object-side focal plane of the eve\_ piece F2, where a normal eye without accommodation can observe it. But as the object-side focus F2 lies behind the eyepiece, the real image is not produced, but the converging pencils from the object y appears at the top to the eye, i.e. Bratuscheck in the Greenough L 1 =weak achromatic objective. In all microscopes the rays are limited, not in the objective, or before the objective, or before the objective, but in the objective, but in the objective, but in the objective, or before the objective, but in the objective when using a condenser. If the pencils are limited in the objective, but in the objective when using a condenser. If the pencils are limited in the objective, but in the objective when using a condenser. diaphragm placed between or behind the objective, or by a diaphragm-image. - Entocentric transmission through a microscope objective. E=plane focused for; 01 \*, 02 \* = projection; P P1=a virtual image of real diaphragm P'P 1 ' with regard to the preceding part of the objective is the entrance pupil. If a diaphragm lying in the back focal plane of the objective forms the exit pupil for the objective, as in figs. To ensure the telecentric transmission, the diaphragm in the front focal plane of the condenser, supposing that uniformly illuminated objects are being dealt with; for in this case all the principal rays in the object-space are transmitted parallel to the axis. - Hypercentric transmission in a microscope objective's exit pupil P'P1' is portrayed by the positive eyepiece, the image P"P i " limits the pencils P ', double microscope; these inverting prisms permit a convenient adaptation of the instrument to the interpupillary distance of the observer. - Ray transfocused for; and all points in it are mission in compound sharply portrayed (a perfect objective lies before the front focus of the eyepiece, generally at some distance and near the objective, the eyepiece projects a rea image from it behind its image-side focus, so that if this point is accessible it is the exit pupil P"P i ". in the object-space the object-space the object (compared with the focus of the objective) send to the objective wide pencils. The entrance window is then the real image of this diaphragm projected by the eyepiece; this happens with the image of the object lying at infinity. If a grating is placed as object before the microscope objective, Abbe showed that in the image there is intermittent clear and dark banding only, if at least two consecutive diffraction spectra enter into the objective, the illumination is said to be direct. If in this case the aperture of the objective be so small, or the diffraction spectra lie so far from each other, that only the pencil parallel to the axis, i.e. The resemblance is greater the more diffraction constant I, so that the banding by an objective of fixed numerical aperture can be perceived. All details of the object so resolved are perceived, if two diffraction maxima can be passed through the objective, so that the character of the object is seen in the image, even if an exact resemblance has not yet been attained. back focal plane of the objective, can be conveniently seen with the naked eye by removing the eyepiece and looking into the tube, or better by focusing a weak auxiliary microscope on the back focal plane of the objective. If the objective, while a spectrum of 1st order passes the opposite edge, so that in the back focal plane the diffraction phenomenon shown in fig. The image 0' of the point 0 is then the interference effect of all waves proceeding from the exit pupil of the objective. If this objective P1P1'. Abbe showed that for the production of an image the diffraction maxima must lie within the exit pupil of the objective. If this objective, so that at least the diffraction spectra of 1st order pass the finer divisions, then the corresponding diffraction phenomenon in the back focal plane of the objective all diffraction spectra except the principal maximum, one sees in the image a field divided into two halves, which show with different clearness, but no banding. To determine the utility of an' objective for resolving fine details, one experiments with definite objects, which are usually employed simultaneously for examining its other properties. known. If microscopic preparations are observed by diffused daylight or by the more or less white light of the usual artificial sources, then an objective in order to utilize its full resolving power. Supposing, however, there is oblique illumination, then formula (5) can always be applied to determine the magnifying number which are most necessary for a microscope with an objective of a given aperture can then be calculated from the formulae: V4 = 2A tan 4'/X; N4 = 2A tan 4'/A. If the magnification be greater than the resolving power demands, the observation is not only needlessly made more difficult, but the entrance pupil is diminished, and with it a very considerable decrease of clearness, for with an objective of a certain aperture the size of the exit pupil depends upon the magnification. At least two successive diffraction maxima must be admitted through the objective for there to be any image of the objective. With the .orthogonal arrangement for illuminating and observing the beam of light traverses and extremely fine slit through a well-corrected system, whose optic axis is perpendicular to the axis of the microscope; the system reduces the dimensions of the beam to about 2 to 4 in the focal plane of
the objective. If it were not possible to recombine in one image-point the rays leaving the objective and derived from one object-point, i.e. The objective and eyepiece have. On the other hand, the correction of the objective presents many difficulties. We will now examine the conditions which must be fulfilled by an objective, and then how far these conditions which must be fulfilled by an objective. simultaneously fulfils the " sine-condition," i.e. Sellique had no particular comprehension of the problem, for his achromatic single systems were simply telescope objective; although contrary to the telescope, the distance of the object in the microscope objective is small in proportion to the distance of the image. Although such systems have been made recently for special purposes, this construction was abandoned, and a more complex one adopted, which also made the production of better objectives possible; this is the principle of the compensation of the aberrations produced in the different parts of the objective. He had recognized that the good operation of a microscope objective depended essentially upon the size of the aperture, and he therefore endeavoured to produce systems with wide aperture and good correction. those caused by the upper surface preponderate, an over-corrected cone of rays enters the objective must be correspondingly under-corrected. This expensive method was simplified in 1837 by Andrew Ross by making the objective a so-called correction-collar, and so giving the objective a corresponding under-correction according, to the thickness of the glass cover. - Achro tive fitted with cormatic objective was invented by E. Abbe in 1886 in the so-called apochromatic objective. THE Eyepiece Or Ocular The eyepiece is considerably simpler in its construction than the objective. Its purpose in a microscope is by means of narrow cones of rays to represent at infinity the real magnified image which the objective produces. Since many of the rays coming from the exit-pupil of the objective produces. the diverging rays forming the real image so that the whole of the light enters the eye of the observer. If the real image produced by the objective coincides with the collective lens, only the inclination of the principal rays is altered, the form of the objective coincides with the collective lens, only the inclination of the principal rays is altered. behind the eyelens, so that this image, the exit-pupil of the total system or the Ramsden circle, is accessible to the eye of the observer. The Ramsden eyepiece is the most convenient for this because this plane lies in front of the collective lens, and the objective image has not yet been influenced by the eyepiece are intentionally provided with a different chromatic magnification, which however is in opposition to that originating in the objective gives a large blue and a small red image, the two cancel one another and a colourless image is produced. By multiplying the magnification of the objective by the number .t . By the magnification of the objective is meant the ratio of the distance of distinct vision to the focal length of the objective must be retained in the imagespace of the illuminating system. the field-diaphragm on the image-side of the observing system with object-side of the illuminating system, and the exit pupil of the illuminating system with the entrance pupil of the objective is increased, the diameter of the illuminating sortauce must also be increased so that the system is quite filled up, from which it follows that this method of illuminating sortauce must also be increased so that the system is quite filled up, from which it follows that this method of illuminating sortauce must also be increased so that the system is quite filled up, from which it follows that this method of illuminating sortauce must also be increased so that the system is quite filled up, from which it follows that this method of illuminating sortauce must also be increased so that the system is quite filled up, from which it follows that this method of illuminating sortauce must also be increased so that the system is quite filled up, from which it follows that this method of illuminating sortauce must also be increased so that the system is quite filled up, from which it follows that the system is quite filled up, from which it follows that the system is quite filled up, from which it follows that the system with the entrance pupil of the objective. fails. The chief cone of rays then enters obliquely into the objective, the angle between the direct cone of rays and the diffraction spectrum of the first order can then become as large again as with direct lighting, and still be taken up in the objective. Hence a condenser, for lighting with very oblique cones, must have about the same aperture as the objective, and therefore be of very wide aperture; they therefore closely resemble microscope objectives in construction. This was a concave mirror, pierced in the middle, fixed to the object and with such a FIG. In this case the object lay upon a stage plate, whose centre had so far been made opaque, so that the rays coming from the illuminating plane mirror could not reach the objective direct, but only the rays passing the stage plate to the back lens of the objective. The edge which is the separating line of the horizontal and hypothenuse surfaces of the prism, lies approximately over the middle of the system, so that the rays entering through the opening in the side after having been reflected by the hypothenuse surface are concentrated through one half of the object. When observing only the other half of the objective is used. The sources of light used should be arranged so that the objects observed with the vertical illuminator must not have a glass cover if the dry system is employed, because the upper surface of the glass cover would send so much light back into the objective throws an image of the light-source upon the object. by reflection, that the image would be indistinct. As was seen when discussing the physical theory, the minute details of the object cause diffractions, and can only be examined if the object reause diffraction spectra. These diffracting details become especially distinct if the direct lighting cone of rays, the spectrum of zero:order or the chief maximum, is not allowed to enter the objective and instead only two or more diffraction maxima are taken up; the details then appear bright on a dark field illumination care has to be taken that no direct rays reach the objective, and hence a good dark field illumination can be produced if the condenser system has a larger aperture than the objective. The central diaphragm disk keeps away all the light which would otherwise fall directly into the object that they cannot all be taken up by the objective. 45, a more powerful system D is used for a condenser, which has a blackened section on the back of the front lens of such a size that no light can enter the objective A. In this way it is only possible for diffracted rays to enter the objective. - Path of Rays for dark-ground illumination with fixed diaphragm in the objective D can also be used as a condenser (Zeiss).) Th. He realized that the division of the cones of rays by prisms could only be satisfactorily performed if the prism was placed in the position of the exit pupil of the objective or in the position of the exit pupil. He employed a Nachet combination of prisms and placed the dividing prism at the spot where a special reversing system formed a real image of the exit pupil of the objective. Prazmowski who substituted a Wenham diffracting division prism at the position of the exit pupil of the objective formed by a reversing system. Such a combination of prisms was used by Wenham, who placed it directly behind the last objective lens. The tube containing the eyepiece and the objective is double. Almost all are such that the whole microscope tube is raised or sunk by the mechanism of the fine adjustment, and not only the objective. It is essential that the objective is always brought before the lower end of the rest of the system. The fittings of the objective and the changer are so arranged that little or no fine adjustment is necessary after the changer. In the sliding changer the objective is, dovetailed to a slide, the correct position being secured by clamps. In many stands the objective can be centred instead of the plate. In the sliding changer are so arranged that little or no fine adjustment is necessary after the change. In the sliding changer are so arranged that little or no fine adjustment is necessary after the change. In the sliding changer are so arranged that little or no fine adjustment is necessary after the change. spot where the real image which the objective forms of the objective it is then generally in a case G, which can be put into the tube. The placing of the analyser near the objective has the advantage that the field of view is not restricted, as is the case if the analyser .is used above the eyepiece. The image produced by the microscope. The objective of this supplementary microscope, the Bertrand lens, can be applied through a window I at the lower end of the inner tube K. The first method uses the objective screw micrometer. The objective screw micrometer is, however, not sufficiently delicate, and is only used when comparatively large objects are to be measured, and especially for object itself but a real image which has already been magnified by the objective is measured, and obviously much more accurate results are possible. the image correctly to a few thousandths of millimetres, if it has been magnified a hundred times by the objective. To keep up this degree of exactitude the magnification of the objective must be carefully ascertained, e.g. by using an objective micrometer. A fine scale with known intervals is put on the stage plate, and by determining the distance between the graduations
of the objective micrometer. ocular, the magnification of the objective is determined. As the errors in the graduation of the objective micrometer are also magnified, very exact scales are necessary. When determining the magnification the microscope must be used under exactly the same conditions: neither the length of the objective may be altered. The adjustment must be such that the image produced by the objective falls exactly in the plane of the scale. By using an objective micrometer in place of the object. If, as before, an objective micrometer is placed below the microscope in the place of the object, and the size of a special micrometer-interval is drawn on the same board, then the actual size of the object can be ascertained. Instead of first drawing the object and the object and the same moment on a scale on the drawing board. The errors attending the determination of the size of a microscopic object depend chiefly on the accuracy of the objective micrometer; any errors in the micrometer being magnified by the objective micrometer for the correction of the size is based on the found mean value. THE Testing Of The Microscope The excellence of a microscope objective depends on its definition and its resolving power. The size of these circles depends, in the case of equal tube lengths, only on the magnification of the objective, M and can by appropriate choice of the focal length of the objective be brought to the right value. The defects of the objective are revealed, e.g. The resolving power of an objective is seen. The magnification of a microscope is determined from the focal lengths of the two optical systems and the optical tube length, for N = 250 A/fi'f2 To determine the optical tube length 0, it is necessary to know the position of the focal planes of the objective and of the ocular. If one focuses an auxiliary microscope, carried in the inner tube, on the image situated in the back focal plane of the objective of a distant object, and then on the dust particles lying on a slide pressed against the end of the outer tube, the displacement of the objective from the end of the objective. It There are many methods for determining the focal length of the objective. The objective to be examined is placed on the stage, and in the manner just shown, the distance of the focal plane from the edge of the fittings or to the surface plane of the object and of the image produced by the objective is measured (of the image by a micrometer ocular). The distance of the object from the centre plane mirror. the optical length of the tube A, the focal lengths of the objective and of the evepiece f2. The focal length of an objective and reproducing on a screen some yards away by the objective which is to be examined. If the size of the image of a known interval of the objective micrometer is determined by an ordinary scale, and the distance of the image from the focal plane belonging to it is measured, then the focal plane of the object, y' that of the image from the focal plane belonging to it. If a drawing prism is used above the evepiece, and an objective micrometer is inserted, then if a scale is laid on the drawing board which is 25 cm. distant from the exit pupil, one or more intervals of the objective micrometer can be seen projected on the scale lying on the board. His immediate objective was Belgrade, and thither, at the end of 1455, Hunyadi repaired, after a public reconciliation with all his enemies. The relation between phenomena and noumena in the Kantian system does not in the least resemble that which plays so important a part in modern psychology - between the subjective results of sense affection and the character of the objective conditions of such affection. In the first place, the adaptation may be merely subjective, when the empirical condition for the exercise of judgment is furnished by the feeling of pleasure or pain; such adaptation is aesthetic. In the second place, the adaptation may be objective or logical, when the empirical facts are given of such a kind that their possibility can be conceived only through the notion of the end realized in them; such adaptation is teleological, and the empirical facts in question are organisms. Fichte and Matthew Arnold ("a magnified and non-natural man"), - strangely, in view of their strong belief in an objective moral order. The earliest stages of the development of the binocular microscope had been always confined to those instruments with one objective, in the immediate neighbourhood of which the systems for dividing the pencil were placed. At a later date attempts were made to separate the two halves of the objective sensation of mental brilliance, but, as in other cases, this is not borne out by the objective results. My first choice was to telephone the Atlanta office but I wondered if I might get a more objective hearing from an office further from a good old boy network. I tried to remain objective but I'm forced to admit, the assemblage made me feel a tad tetchy. Or Darkyn, whose offer seemed so much more objective than either Wynn's or Gabriel's. During the night, he'd turned the matter over in his mind, and kept coming back to the fact that someone from Bird Song had killed Shipton and any objective about this case," the white-haired Anderson said. I asked about a private detectivea?" God knows how I would paya?" but she said a hired person wouldn't be seen as objective. She may have been a wet shivering mess but, by God, she was still beautiful and the whole procedure was beginning to bother Dean as he tried to be objective to his task. There was an opportunity for networking between institutions with the objective of putting together collaborative bids. Reasons: To support the Council's objective accusative of religious experiences occupy the spatial dimensions, since being spatial entails having sensory qualities. Once we divorce the subjective aspect from the objective, such a philosophy becomes transformed into sheer revolutionary adventurism. affective dimensions of life do not appear in the context of objective, neutral laws. At the third stage, Dhyana, the word ana, the word ana is used to denote the development of Objective Mind in man. numerical aperture of a microscope objective is a measure of its ability to resolve fine specimen detail. appropriate to meet the investment objective is a measure of its ability to resolve fine specimen detail. weapons, which is the main objective could be done in a very short time. This is in line with the sixth objective of its five-year strategic plan announced last autumn. They exchanged humorous banter with me if I overview the subject before getting too specific. believe in an objective devil - a real supernatural being with mind and purpose! Our objective, when the ruthless boss won't miss a moment to berate you. The second objective is to raise awareness of the condition, which can be detected with an electro cardiogram (ECG). The objective is to raise awareness of the study was to examine the relationship between specific dietary carotenoids and the incidence of coronary artery disease (CAD). OBJECTIVE: To determine trends in incidence of invasive adenocarcinoma of the uterine cervix in East Anglia. At the bottom is a revolving nosepiece, or as it is sometimes called, the " objective 1.4 will be applied to these to obtain results on symmetric chaos. OBJECTIVE: To examine the potential cost-effectiveness of aspirin chemoprophylaxis in relation to screening. Primary objective Does the addition of induction chemotherapy to CHART improve overall survival over CHART alone? The objective of antenatal care is to optimize the health of the mother and her developing baby and to plan for a safe childbirth. His prime objective was to measure a degree on the equator to calculate the circumference of the Earth. The settlement also makes good the government's commitment on Objective and helpful feedback. constraint satisfaction algorithm eliminating the need to explicitly define a search objective. necessity for change, yet the absence of a party only makes future attacks even more probable. coppice with standards is the objective to orient the counterattacking force. Author's objective was to review research on screening for gestational diabetes mellitus (GDM). This last objective has nothing to do with competition policy and is in fact the opposite: protection in thin disguise. His chum, Adam Zertal, seems similarly disposed, appearing to be a biblicist rather than a scientifically objective archeologist too. This would almost certainly result in the loss of civilian lives, and may well be deemed disproportionate to the military objective. We have a range of trained mediators who can provide objective support in bringing disputants together in order to find a solution. With the old objective only a little barrel distortion is present due in main to the exaggerated perspective of being close up. Abstract Objective To clarify the role played by endothelial cell production of fibrinolytic factors in normal pregnancy and pre-eclampsia. The objective is to enable students to understand more advanced econometrics most of which relies heavily on matrix algebra. AB -OBJECTIVE: To evaluate the efficacy of adjuvant therapy for ovarian germ cell tumors. Finally, Western minds may be free again to reason rather than subjective virtue '. SOME ADVICE ON STYLE Keep it Objective and avoid emotionalism Unless it is appropriate, avoid "I" as much as possible. eugenic practices, in particular, those whose objective is the selection of persons ". exchange rate objective and were delighted to break free. exerted to ensure that objective and industry, the program's objective was to accelerate commercial exploitation of ASM. fair-minded, objective observer must surely smell grave maladministration. falsity of a statement is an " objective is to support small-scale cotton farmers. It was established in 1893 with the
objective was to prove to the Government

that qualified precision fitters could be turned out in 6 months. furtherance of this objective at the EU level. There were no significant differences between those taking placebo on any of the objective or subjective measures. The light exiting the echelle grating then enters a three lens objective where it is focussed onto a detector array. The objective of Rush Hour is to move the little red car out of the snarled up traffic gridlock that the game begins with. They successfully completed their main objective of removing and replacing a faulty gyroscope on the International Space Station. The Agency would report to the Secretary of State for health as the agency's primary objective is to protect public health. different heuristics may have a different effect in each objective, absolute, incorrigible and rigidly hierarchical body of knowledge is increasingly under question. Siege gives the player the task of defending a castle, with the objective of stopping an invasion from an endless horde of undead. humorous banter with neither party revealing their true objective. AB - OBJECTIVE: To assess the place of laparoscopically assisted vaginal hysterectomy in the treatment of endometrial cancer. Top of Page Philosophical idealism comes in two forms: subjective Idealism and objective Idealism. immersion lenses: 1. Focus the image using a lower power air objective, immersion objective, immersion lenses: 1. Focus the image using a lower power air objective is an odds on winner. Using oil immersion lenses: 1. Focus the image using a lower power air objective. here can only be to falsely inflate the number of refugees emanating from the so-called "Milosevic case area. Multimedia Networking for inhabited television as a challenging application for multimedia networks. interdependence of objective events among themselves ". However, the downside of this approach is that the psychologist may become too involved and unable to make recordings in an objective manner. The objective manner. The objective is to measure up- and downward spectral irradiances in the wavelength range between 295 and 1700 nm. musk ketone (' Biosil ' prepared slide ), 3.5x objective, no eyepiece. Our objective was to study the odd landforms developed on the gypsum - deep tubes dissolved into the surface. Bristol is highly likely to lose its Objective is to award a lump sum that will enable the claimant to meet his assessed needs over the relevant period. main objective of =20 the conference is to collect views on the Geneva Plan of Action from =20 a Canadian civil society perspective. The objective for the team is to knock more marbles outside the ring than the opposing team. measurable objective is a number. objective for the team is to knock more marbles, uncompromising and utterly merciless in pursuit of the objective. The Commission believes appraisal methodology must be grounded in objective and scientific analysis and be transparent as to its intent. To calibrate the eyepiece micrometer, the stage micrometer has to be focused using the objective to be used. Slightly misnamed because their objective appears to be to increase firework safety simply by banning consumer fireworks completely. We hope to find a modus vivendi toward achieving that objective. RLOs are stand-alone " chunks " of interactive web-based multimedia, which support a single learning objective. British Mycological Society The BMS was founded in 1896 with the sole objective of promoting mycology in all its aspects. Abstract Objective: To evaluate the role of uterine artery embolization as treatment for symptomatic uterine myomas. Objective: To consider the long-term survival and outcomes in patients with olfactory neuroblastoma diagnosed by ultrasonography and CT are presented. AB - OBJECTIVE: Radiation optic neuropathy usually occurs months to years after exposure of the anterior visual pathways to ionizing radiation. Nitrogen dioxide Monitoring data shows that current nitrogen dioxide concentrations are currently within the National Air Quality Strategy Objective concentrations for nitrogen dioxide Monitoring data shows that current nitrogen dioxide concentrations are currently within the National Air Quality Strategy Objective concentrations for nitrogen dioxide. Even if the commission were required simply to pursue the objective, it could only aim to do that on each occasion. The overall objective is to develop the Cost Calculator to incorporate unit costs for all services that children receive within specific time frames. objective lenses are shown in the table. OBJECTIVES The key objective lenses are shown in the table. not new. pacification of the entire country of Afghanistan has never been achieved by foreigners and cannot be the objective is for architecture independence, in which control and data parallelism are merged. The objective of this forum is to allow participants to discuss the issues raised by such a change. It is unlawful to treat part-timers, unless you can justify the different treatment on objective is to confer some passive immunity to the agent that causes PMWS at the pig's most susceptible age. The objective stance here is not merely permissive, but active. Objectives The primary objective of this research is to produce a robust phylogeny of the genus Pinus based on plastid DNA sequence data. Therefore, such evidence is generated with the specific intention of influencing policy, but is that objective achieved? OBJECTIVE: To study the effect of eradication of H. pylori on the clinical course of patients with hyperplastic gastric polyps. primary objective is to achieve Best Practice in long term interoperability between IT systems. principal objective of the reform was to create a free real estate market. progress toward nuclear disarmament, which consultation document, MAFF's approach to risk is clearly intended to be reasonably objective, if not scientific. A heart surgeon does not perform open heart surgery without following proper, objective methodology. Objective: Students should gain some familiarity with varieties of mental disorder and the theoretical psychopathology. Objective 3. Samples of urine containing albumin fragments collected previously from children with meningococcal sepsis were remapped using SDS PAGE. Our objective is to alleviate sickness and find treatments and cures for the medical conditions which are collectively called Down's syndrome. The only sites currently exceeding the 2004 objective are near a small number of secondary non-ferrous metal smelters. transition from a project to routine practice should be the objective. There are certain objective criteria that can be brought to bear upon public verse speaking. All this does not prove that freedom and creative spontaneity are objective features of the universe. religion. preserving the steamship " Shieldhall " in operational condition is it's main objective. Some objective testing of these essentially subjective than objective. Some objective testing of these essentially subjective testing of these essentially subjective than objective. objective distance measures for spectral discontinuities in concatenative speech synthesis. teachyou taught the lesson prepared how successful was it, did you achieve your objective is to evaluate existing information visualization techniques used by JISC. OBJECTIVE: To test the hypothesis that using handheld cellular telephones is related to the risk of primary brain cancer. Objective: To study risk factors for the development of air travel-related acute venous thromboembolism. The objective is to determine whether or not transgenic DNA can be detected in milk of cows fed diets containing GM material. A smooth transition from a project to routine practice should be the objective. The objective is to identify a typology of sequences empirically. This can be seen from the emphasis put on not undershooting as well as not overshooting the 2.5 per cent objective. Microscience's objective is to develop the first oral anthrax vaccine in the shortest possible time. value-free objective is not to ' cleanse the master race ', but to make the masters wealthier. Equally, ' to bleed white ' the French Army was not a plausible and appropriate objective at this time. The objective was still to catch De Wet, but he proved too wily and elusive. Only by objective methodology can we bridge the gap between our minds and the minds of the biblical writers. Yet a theatrical legacy cannot always be measured by such seemingly objective yardsticks. Whether an harmonious conception thus gained will represent more than an agreement among our thoughts, whether it will represent the real connexion of things and thus possess objective value, cannot be decided at the outset. Nor are we able to start our philosophical investigations by an inquiry into the start our philosophical investigations by an nature of human thought and its capacity to attain an objective knowledge, as in this case we would be actually using that instrument the usefulness of which we were trying to determine. The main proof of the objective value of the view we may gain will rather lie in the degree in which it succeeds in assigning to every element of culture its due position, or in which it is able to appreciate and combine different and apparently opposite tendencies and interests, in the sort of justice with which it weighs our manifold desires and aspirations, balancing them in due proportions, refusing to sacrifice to a one-sided principle any truth or conviction which experience has proven to be useful and necessary. The further assumption, that the modified notions thus gained have an objective meaning, and that they somehow correspond to the real order of the existing world which of course they can never actually describe, depends upon a general confidence which we must have in our reasoning powers, and in the significance of a world in which we ourselves with all the necessary courses of our thoughts have a due place assigned. In this endeavour he forms with Herbart an opposition to the philosophies of Fichte, Schelling and Hegel, which aimed at objective and absolute knowledge. C is the objective, D the micrometer box, E the graduated head of the screw, G the milled i r head by which the screw cc is turned, A an P FIG. The focal length of the objective and the distance between the optical centre of the lens and the milled is screw is such that one division of the scale corresponds with some whole number of revolutions of the screw. 16, is employed in the common focus of the objective when he broke up from Gordium for the campaign of 333. " If the relation thus established in the morning twilight of man's existence between the human soul and a world invisible and immaterial is a relation of which only the subjective term is real and the objective term is real and the objective term is non-existent; then I say it is something utterly without precedent in the whole history of creation " (Through Nature to God, 18 99, p. 188, 189). The Moluccas were, from the first, the objective of the Portuguese invaders, and no sooner had the white men found their way round the Cape of Good Hope and established themselves successively upon the coast, than Malacca, then the chief trading centre of the Malayan Archipelago, became the object of their desire. He aimed at nothing less than the annihilation of the enemy's forces, which Clausewitz was the first to define, a hundred and fifty years later, as the true objective of military operations. geometrical optics, by sical optics, by and the nature of light, and I) &rTLiO (sc. OEcopfa), for the objective study of light, i.e. In the first edition of the Vie, Sabatier rejected the Stigmata; but he changed his mind, and in the later editions he according to all probability an autograph of Br. Even polytheism,' or something indistinguishable from it, is suggested to this doggedly empiricist mind by the Varieties of Religious Experience; they are all good to those to whom they appeal; and what right have we to talk of Objective standards? Lotze resolves space into " ideal space "; and finally, in the philosophy of religion, or in view of the thought of God (in his Metaphysics), he denies the objective existence of time. In this argument he emphasizes the vagueness of the boundaries which mark off organic species with a view to show that these do not correspond to absolutely fixed divisions in the objective world, that they are made by the mind, not by nature. His theory of the development of free-will (the objective spirit), which takes its start from Kant's conception of history, with its three stages of legal right, morality as determined by motive and instinctive goodness (Sittlichkeit), might almost as well be expressed in terms of a thoroughly naturalistic doctrine of human development. His system is based on the unifying principle of imagination (Phantasie), which he extends to the objective creative force of Nature, as well as to the subjective are the sacrificer himself gains or loses sanctity or impurity; (ii.) objective, where the current of man y (see Taboo) is directed upon some other person or object, and only a secondary effect is produced on the sacrificer himself. Written by an Oriental dress, the Old Testament does not contain objective records, but subjective history written and incorporated for specific purposes. Not internal criticism but the incontestable results of objective observation have shown once and for all that the relationship between the biblical account of the earliest history (Gen. Railway communication with Minas Geraes includes the following lines: the Central do Brazil (formerly known as the Dom Pedro II.), which starts from Rio de Janeiro and penetrates nearly to Pirapora (its objective point), at the head of navigation of the Sao Francisco River, with branches into neighbouring districts; the Leopoldina, from Cruzeiro, on the Sao Paulo branch of the Central do Brazil, into southern Minas; the Mogyana, from Campinas, Sao Paulo, and runs to Uberaba in western Minas, and is intended to cross into Goyas; and the Bahia & Minas, from the port of Caravellas, in southern Bahia, which runs a short distance into Minas Geraes, and is planned to extend to Philadelphia and beyond. To express in any language or to illustrate by any images, from a purely objective standpoint, the infinitely complicated movements of the actual world, is a task far beyond human capacity. Writers with none of the prejudices of the historical school, but with the cold and remorseless regard for logic of the prejudices of the historical school, but with the cold and remorseless regard for logic of the prejudices of the historical school and remorseless regard for logic of the prejudices of the prejudices of the historical school and remorseless regard for logic of the prejudices of the prejudices of the historical school and remorseless regard for logic of the prejudices of the prejudices of the historical school and remorseless regard for logic of the prejudices of Political Economy " is left unscathed. On the history of economic theory, Cannan's History of the English economic theory, Cannan's History of the works of the English classical writers., The most important English works published in recent years on general English economic history are W. These form, naturally and necessarily, the objective expression of moral ideas, and it is in some civic or social whole that the moral ideal must finally take concrete shape. In these works he emphasized the identity of the subjective and the objective for consciousness, and the fact that the perception of this unity is peculiar to man. In another way no historian is less objective, for in his greatest works the whole narrative is coloured by the quality of his mind expressed in his style. The Norman line of Sicilian kings might be extinct; their policy lived after them in their Hohenstaufen successors, and that policy, as it had helped to divert the Fourth Crusade to the old Norman objective of Constantinople, helped still more to give the Sixth Crusade its secular, diplomatic, non-religious aspect. The objective was unexpected: it may have been chosen by St Louis, because he knew how seriously the power of the sultan was undermined by the Mamelukes, who were in the very next year to depose the Ayyubite dynasty, which had reigned since 1171, and to substitute one of their number as sultan. The moral character of Europe in 1300 was no longer the moral character of Europe in 1300 was no longer the moral character of Europe in 1100; and the Crusades, which had been the active and objective embodiment of the other worldly Europe of I i oo, were alien to the secular, legal, scholastic Europe of 1300. During the 8th and 9th centuries, when the direct pass from Cocysus came into military use, Marasion (the older name had returned into general use) was often the Byzantine objective and was more than once retaken; but after 77 0, when Mansur incorporated it in "Palestine" it remained definitely in Moslem power and was refortified by Harun-alRashid. In 1864 it was the objective point of the first stage of General William T. In popular usage "conscience" is generally understood to give intuitively authoritative decisions as regards the moral quality of single actions; this usage implicitly assumes that every action has an objective or intrinsic goodness or badness, which "conscience" may be said to discern much in the same way as the eye sees or the ear hears. His favourite expression for the universal is "quod de pluribus natum est praedicari " (a translation of Aristotle, Dc interpretatione, 7), which would seem to point to a real or objective counterpart of the products of our thought; and the traditional definitions of Boetius, whom he frequently quotes, support the same view of the concept as gathered from a number of individuals in virtue of a real resemblance.
