Mediheal mogongtox soda bubble sheet mask.

What are your thoughts on it? There is 1 mask in the sachet. Mask in a sheet. For skin in need of cleansing. Oxygenates, cleanses, moisturizes and refreshes the skin. It contains beneficial active ingredients. HOW TO USE: 1. It was placed on a sheet made of high-quality charcoal (binchotan), which was soaked to the brim with an effervescent essence that creates bubbles, thanks to which it perfectly cleans and oxygenates the skin. It's already starting to bubble! With masks that comes with a one size fits all sheet, you're bound to have issues with the fit. Let the mask bubble for 10 minutes. It was definitely different than normal sheet mask but I can't quite put my finger on it. (Check details) Registered users can join our loyalty program, a reward system based on points. Once the mask is applied onto the face and begins to bubble, the scent kind of disappears. Texture: The mask sheet itself was interesting in texture. The mask is formulated with various herbal extracts and carbonated water. Details Register and stay up to date with new products and promotions! Activate and hold the button to confirm that you're human. My Thoughts: It bubbles! Just like the bubbly cloud mask. The bubbles are white though and since the sheet mask is black you can see the bubbles vividly once it starts the bubbling action. I'm not sure if the sheet is the whole reason for this or if its formula has something to do with it too, but this bubbly mask from Mediheal didn't tickle me at all. However, I was happy to find the English ingredient list on the back. This post contains affiliate/referral link, which helps to support the blog, my full disclaimer is here. Have a look at the list of activities that earn you points. I was not compensated in any other way. Mix (shake) the contents of the package before use. 2. Apply the mask to cleansed skin, starting from the forehead, through the cheeks, towards the ears and chin. 3.
