JVC car stereos are available in a variety of models, capable of performing different tasks to meet the needs of car stereo enthusiasts and casual listeners. JVC stereos can be programmed to remember your favorite radio stations and audio preferences such as BASS, TREBLE and other specific output specifications. Clock setting, your favorite preset stations and your personal audio preferences are among the first things you will do after installing Jvcstereo. Press the "POWER" button in the upper left corner of the stereo to turn on the unit. Press the "Color" button to change the color of the display. The "Color" button is located to the left of the volume control knob. Press the "MENU" button to switch to the clock setting mode. Press the volume control knob to select the time of day. Press and hold the knob while turning to change the value of the hour field. Release the knob when the correct time is displayed. Press the knob to select the minutes. Press and hold the knob while adjusting the minutes. Release the knob when the correct minute value is displayed. Press the "Menu" button to navigate to the tuner. Use the search buttons to tune to a frequency. Press and hold "Menu" while turning the volume control knob to select the number you want to designate for the preset station. Once you have assigned the number, press the volume control knob until the display shows "Memory" indicating that the frequency has been stored. Repeat the step to set up to 18 total preset frequencies. Press the "EQ" button to select the pre-selected audio mode. You can choose between users, rock, classic, jazz, hip hop and pop. Release the "EQ" button when the selected audio mode is displayed. Choose User in the preset audio mode to set a custom tone for your music. Press and hold "Menu" in the user setting mode and rotate the volume control knob to select the tone you want to adjust. The choices are low, high and medium. Press the Volume Control Knob when the tone you want to select is displayed on the screen. Rotate the knob to adjust the tone and release the knob when the tone is adjusted to your preferences. Rotate the knob to navigate on the new tone and press the knob while you rotate to adjust the tone.
