# Sectionalism worksheet quizlet

## 5 Written questions

1. a device for blowing air on a flame in order for it to grow

\_\_\_\_\_

2. A furnace for melting or refining metal.

\_\_\_\_\_

3. mouth

\_\_\_\_\_

4. A heavy iron block with a flat top and concave sides, on which metal can be hammered and shaped

\_\_\_\_\_

5. covered or filled with soot, a black powder produced when something is burned

\_\_\_\_\_

## 5 Matching questions

1. \_\_\_\_\_ scows sliding down the canal.

A. to hang loosely

2. \_\_\_\_\_ look at somebody **casually**

B. to look quickly

3. \_\_\_\_\_ glance at her watch

C. in an unconcerned or informal manner

4. \_\_\_\_\_ rattraps **dangle** on his chest

D. A flat-bottomed boat used for transporting cargo to and from ships in harbour

5. \_\_\_\_\_ treat **indifferently**

E. without interest or concern

## 5 Multiple choice questions

1. someone who does not belong

A. treat **indifferently**

B. **intruders** usually unwelcome

C. rattraps **dangle** on his chest

D. a great deal of **clatter**

## Transcription and Translation Worksheet

For each of the following, fill in the DNA, the mRNA sequence, the tRNA anticodons, or the amino acid sequences that have been left blank. If several sequences might work choose any one.

1. DNA TAC TGA TCG ACC CCC ATA ATG AAA ATC  
 mRNA AUG ACC ACG GGG GGG GAG GAC GGG GAG  
 tRNA UAC UGA UCG ACC CCC AUA AUG AAA AUC  
 AA MET THR SER TRY GLY TYR TYR PHE STOP

2. DNA TAC CCG TCC GCC GTC GAC AAT ACC ACT  
 mRNA AUG GCG AGG GCG CAG CUG UUA UGG UGA  
 tRNA UAC CGC UCC GCC GUC GAC AAU ACC ACU  
 AA MET ALA ARG ARG GLU LEU LEU TRY STOP

3. DNA TAC CAC CCC CGT ATG GCT GGG AAT ATC  
 mRNA AUG GUG GGG GCA UAC CGA CCC UUA UAG  
 tRNA CAC CAU CCC CGU AAG GGU GGG AAU ACC  
 AA MET VAL GLY ALA TYR ARG PRO LEU STOP

4. DNA TAC TCT CCC AAA AAA TAC CAC CCC ATC  
 mRNA AUG AGA GGG UUU UUU AUG GUG GGG UAG  
 tRNA UAC UCU CCC AAA AAA UAC CAC CCC AUC  
 AA MET ARG GLY PHE PHE MET VAL GLY STOP

5. DNA TTC ACA CTA CGC ATG TTC GGG ATT  
 mRNA AUG GAG ATG AAA GGG UAC AAC CCC UAA  
 tRNA UAC CAC ACA CUA CGC AUG ACC GGG AAA UUU  
 AA MET Glu A Cys Asp Met Tyr Asp Met STOP

**10-11: Ecology Notes Worksheets: Introduction to Genetics**

**DO THIS SECTION FIRST:**  
 Vocabulary: There are major terms to understand when studying genetics. Use your text (all of Chapter 11) to define them. Shorten up or record the definitions so you have the phrases to memorize.

- genetics
- fertilization
- trait
- P
- F<sub>1</sub>
- hybrid
- gene
- alleles
- dominant
- recessive
- Principle of dominance
- F<sub>2</sub>
- segregation
- genetics
- probability
- homozygous
- heterozygous
- genotype
- phenotype
- Principle of independent assortment
- incomplete dominance

# DNA REPLICATION WORKSHEET

1. Why does DNA need to replicate?

2. In relation to the pictures below: Explain three main steps in the process of DNA replication. Name the enzymes that go with each step

3. In which direction are new nucleotides added during replication?

4. What is the difference between a leading and a lagging strand?

5. What do you think would happen if the process occurred incorrectly?

adverse reaction be satisfactorily documented by the donor center staff, including the measures taken to assist the donor and the resolution of the reaction, and it must be indicated that  $\bar{A}$  has been assessed by the doctor or authorized substitute. Questions regarding the information contained in this Guide should be addressed to the CBER, Inspection and Surveillance Division, Program Surveillance Division (HFM-654) at 301-827-6220, or to the ORA/ORO Division of Emergency and Investigative Operations at 301-827-5653. Records should be kept for daily standardization and calibration if the required readings are not obtained. You should keep a record of the issues attributed to the defective equipment and soft items. However, investigators should assess the competence of staff and their numerical adequacy. STANDARD OPERATING PROCEDURES An original plasma installation shall submit a supplement to the application for a biological license when making changes to the following SOPs: eligibility donor records, preparation of arms for phlebotomy, information material on AIDS, donor records, including informed consent forms, component preparation, and disposal of unsuitable products. Calibration procedures shall ensure that autoclave functions as intended, i.e. sterilization of supplies for the preparation of the arms and/or decontamination biopercular material. See the CBER Memorandum entitled 'Volume Limits for Automated Collection of Source Plasma' of 4 November 1992. Incorrect infusions of red blood cells and any associated deaths must be documented by company and any associated deaths must be reported to the CBER/Inspection and Surveillance Division (HFM-650). Preventive maintenance plans shall be written by the manufacturer of the plasmapheresis equipment. Only FDA approved administration/transfer sets and plasma containers should be used. The And repairing the records of each separate automated collection device in use can provide evidence of problems or failures and corrective actions taken. Describe which disease states apply. Accident records shall be maintained and made part of the record of each donor concerned. The SOP should address the procedures for documenting fatality and the reporting required. Included in the rule are requirements for facilities to develop procedures to ensure the safety of employees with a potential exposure to biological materials and procedures for the disposal of medical waste. Refer to March 20, 1991, Memorandum, "responsibility of blood establishments related to errors and incidents in the production of blood and blood components" for further guidance. Detestities must be reported to the Compliance Department and quality of the CRER Biological using one of the following options: (1) telephone number 301-827-6220; (2) e-mail address "fatally@cber.fda.gov"; or (3) fax number 301-827-6748. The blood collection containers currently approved with anticoagulant (except heparin) for manual apheresis are produced by Baxter, MedSep and Termo. Calibration should be performed as necessary, with appropriate records maintained. The company should have a mechanism to maintain SOPs, and SOPs should be readily available to the people who perform the work in each production area. CER Assigns a license number after the first biological license application is approved. Donors may have pre-existing antibodies or may have been sensitized to produce specific antibodies in an immunization program. Establishments should report changes in their name, address or products to the division of blood applications. The And the calibration of the microhematocrit centrifuge can be performed with a market prepared control or other methods, for example, duplicate samples tested to more intervals. Click here to continue to continue Section 2 Back to: Main page | Start of inspection does not create nor to give any right to or on any person and does not work to link the FDA or the public. The biological indicators must be used periodically and the temperature indicators, such as the heat-sensitive tape, must be used with each race to verify that the materials are sterilized. Reactions, including, but not limited to, viginosity, fainting, nausea, tingling, washing, hissing breath, chest pain, low blood pressure, quick heart rate, low back pain, bronchial spasms, difficulty breathing, loss of consciousness and convulsions, should be evaluated by the doctor / doctor's substitute. The Auditors' guide project "informed the  $\bar{a}$  c
