Do you want to use Anti-ban WhatsApp Mod with a lot of features on your device? If yes, then you can with the WhatsApp Plus APK on your Android SmartPhone. Actually, the WhatsApp Plus official is no longer because Mark Zuckerberg has banned MOD apk users and also WA Team has sent legal communications to the developer. They didn't stop there, and they did something we called selfish. As with the words of the version creator more, they banned his Facebook and Instagram accounts. It's crazy, isn't it? However, the developer named Rafalense created the Plus version at the beginning. Now, there is no project that develops under WA Tree. But it has a separate app that is called similar to its previous work. It is Plus messenger, an instant messaging app that is working with the help of Telegram API. It has a lot more features than a telegram. Now, here we will give you the best version WhatsApp Plus Clone since there are so many clones available. It will help you to use the last base on how for the official. What is WhatsApp Plus APK? Currently, we have the best clone for you which is made by ALEX Mods. One of the interesting things is that it is quite similar to the YoWhatsApp APK but not completely based on it. A popular wamod that is specially dedicated to users who wanted more features over the official one. Although many wamods have been developed based on YoWA, I still prefer the MiNi versions above them. These are my best choice for you if you are not a great fan of more features. I hope you understand. By the way, this WhatsApp Plus has no annoying ads. So, you can quietly chat with your favorites. The extraordinary thing is; you can use the latest official application base and can also use 4 WA accounts on the same Android device, but with different numbers only with the help of NoWhatsApp for Android.
