One day, you just try to customize your home screen, but the Aren apps don't move. All widgets and apps are just attached to the place. This happens when you locked the layout of the home screen, to unlock it, know how to unlock the lalay of the home screen in Android phones. This article will demonstrate the possible ways to unlock the Home Mobile / Tablet screen for your Android device. Not yet, we are only covering the popular brands. But the settings are quite similar in all Android phones, we try it. How to unlock the layout of the domestic screen (Android phones), so there are two ways to unlock the home screen, unlock it directly from the home screen or you can go to settings. During your mobile phone, you can use any of the methods. # 1 unlocks directly via home screenstep-1: â, on the home screen, press the screen a long time in the empty space, you will open the options, select Å ¢ â,~ Å "settings ¢ â,~ Å" ¢.step-2: Å, after completing step 1, the Options menu will open. In that selection Å ¢ â,~ Å, Å ¢ â,~ Å ¢ â,~ Å ¢ â,~ Å ¢ â,~ Å ¢ â,~ Å "Home ScreenÅ, â" ¢ Å, Å, in Settings.stizi.Stip-2: Touching the home screen, you can see the possibility of unlocking the layout of the screen Initial (as shown in the image). So, here it has successfully unlocked the layout of the home screen. If you have yet found, how to do it, don't worry. Let me give me the formula I use to formulate the idea of Base.it no matter Which Android Phone you have, go to Settings and search for Å ¢ â,~ Å "Home ScreenÅ, â,~ Å "¢. just touch it and find the option to lock / unlock the home screen. I hope you have found this information site, we are willing to listen to your questions, just comment on it. The 3 effective ways to unlock your Android phone without factory reset (opens in a new browser tab) Adroid Pie Update for Galaxy S9 and S9 + Locks the arrangement of the Home Galaxy S9 screen so you don't miss customization due of accidental touches. Although it is trivial and can be found in some other Android phones, many owners of Galaxy S9 and S9 + will find this is one of the useful features of Android Pie Update for Galaxy S9 and S9 +. This Android Android Guide Guide to the Galaxy S9 Android Guide Show how to block the arrangement of the Home S9 Galaxy S9 screen on Galaxy S9 and S9 + with Android cake update, and what warnings are if you block the layout of the home screen. Why could you need to block the layout of the home screen? You can customize the Home Galaxy S9 screen in many ways. You can use third-party themes, remove Baixy Home from the Home screen, edit the wallpapers, adjust the grid layout, add app folders, PIN Individual files on the Home screen, show photos on the Home Galaxy S9 screen (using widget) And manage panels for the main screen. In addition, GALAXY S9 and S9 + also support the horizontal mode of the Home Galaxy S9 screen. But very easily, the customization can be immediately venied by accidental taps. For example, your children could eliminate the widgets from the screen if you make your hands on the screen. Many owners of Galaxy S9 and S9 + want to block customization after the initial configuration because most of the The home screen rarely changes after one or two months. Now, in the Android cake update for Galaxy S9 and S9 +, you can lock the Layout of the Home Galaxy S9 screen so you don't miss the customization so easily. Of course, only blocks the layout. You can not add or delete app or widget icons once the layout of the Home Galaxy S9 screen is blocked. But it is still possible to use the modification mode of the Home Galaxy S9 screen to customize the home screen. How to lock the Layout of the Home Galaxy S9 screen? Like other new features of Android Pie Update for Galaxy S9 and S9 +, the Layout feature of the Home Lock screen is not enabled by default. You have to enable this this To lock the layout of the home screen. In Galaxy S9 settings, tap the display as shown below. On the display settings page, as shown in the screenshot above, tap the main screen. On the Home Screen Settings page, you can then find the option to lock the layout of the main screen, as shown below. You can touch the switch to enable it. If you want to add app or widget icons to the Home screen or want to reposition the app / widgets, you can use the switch to temporarily unlock the layout block of the home screen. After finishing customization, you could turn it on. Once the home screen layout is blocked, you will not be able to transfer apps or widgets. For example, as shown in the screenshot above, after blocking the layout of the home screen and try moving or deleting an app icon, you will get the head-up notification cannot move the object. LOCKED domestic screen layout. If you want to transfer or remove the app icon on the Home Galaxy S9 screen, you need to unlock (disable) the layout of the home screen. What are the warnings? As mentioned, this function blocks only the layout of the home screen. It prevents you from adding or removing or transmitting the apps and widgets on the main screen. However, even after blocking the Layout of the Home Galaxy S9 screen, you can change the layout in the modification mode of the Home Galaxy S9 screen. For example, Å, you can still delete a home screen panel in the modification mode even after blocking the layout of the home screen. You can also automatically change the layout by changing the grid of the home screen. For example, in a home screen panel, you have 25 app icons in Layout 5 * 5. When changing the 5 * 5 to 4 * 5 home screen grid, the 5 app icons that cannot be adapted to the new layout The current panel will be added to a new screen of the grid. Now, if you change in 5 * 5 Grid of the home screen, Å, the 5 app icons on the newly created Home screen panel will not be restored to the old panel. It will remain in the new panel. The original panel will still have 20 app icons (but now with 5 empty slots). Another cable, the layout function of the S9 locking galaxy screen is that it is mutually exclusive with add Add Apps to the home screen automatically (for newly installed apps). Logical. If you lock the layout of the home screen, the apps just installed will not be added automatically. You need to unlock the Layout of the Home Galaxy S9 screen before you can add any app to the Home screen. Can you lock the Layout of the Home Galaxy S9 screen immediately? Do you understand the warnings when you use this function?
