Dota 2 invoker build. Dota 2 invoker guide.

Hey! I thought about adding something to my first guide, since the answer was quite positive. A list of spells, and how to use them. Cold Snap (QQ) - Incredible deactivation. Level 4 We can disable the zip closure and AM/QoP flash if you do it correctly. Level 5 is reliable. Used to set up almost all combinations. Incredible on the track too. Use it when the enemy is on low ground and at approximately HALF its maximum reach of correctness and forged air bubble range. You'll force a save. Also fuck Earthshaker, jakiro, etc. You can counter-attack the slam echo with a stalemate, because the agitator cannot keep up with his stunches and the es rarely receive bkb/Ghost Walk (QW) - "THE GANHOOU INVOKER WITHOUT POW?! Probably my fastest spell invoked lul. Super good in gangs. If it is fast enough, you can use it to avoid things like Mana void if you see the animation. It has the time ZERO devastated in such a way that abuse. Use it to hunt killings in the middle of the game late. Use it to stand behind enemies and cut waves. Use it to escape, to mount gangs to run from point A to B. YOU CAN GESTWALAR POWER TO USE TP DURANTE CHANNEL. Tornado (QW) - Don't use this in a chrono. It is undone to be able to counteract the flames, the wind, the Guardian Angel, the Jingu batteries, the RUNES, etc. Used to assemble almost all combinations. I usually go 3-7-7 between QWE before taking a cataclysm. Learn the elevation time of level 3, 5 and 7 quas. Use a lobby for this, it's easy. Forge Spirit (QE) - Your best friend on the track. What's more bulshit than the right Invoker click of over 100? A lacquer to also do respectable dmg! Use it to cs on the track, push waves and as a Bot target later. Each blow melts the enemy armor, so make sure you hit the enemies as often as possible! (If you're making a lead against the summoner, kill thelvl 1 Quas forges the spirit. It has a range of shit and a cv of shit and does not draw aggravating! Ice Wall (QQE) - "Wait, does this thing exist? - Bad Summoners. It's an amazement, almost unfair. Beside sunstrike, these are your best. I remain not perfect (see Sumiya holy shit), but to abuse abuse to devastating. I use it on enemies who can't get out easily. On the track, good against TA. Icewall cold when she is dipping into you. She's going to kill you, but getting out will be harder. Besides, in the middle of the game you can defeocate someone back to the fight. Imagine this being an axe or a conviction without bkb. They're finished! Alacrity (WWE) - Use this in the cs range easily. In my agricultural pattern, I usually invoke forge while caught the hard field in triangle, then use alacrity for the old ones. Make old without it is annoying and slow. In the last game, I STRONGLY recommend using it in your transport in every fight. There is rarely a time when Invoker is best user in team fights. Too strong? Just click on your photo at the top as I do. It melts towers. Its greatest sorcery of damage out of the cataclysm. There's not much to say. Use it to destroy enemies in chrono/RP/blackhole/tornado. Besides, you can use it to push tracks but make sure that you won't fight in the next 55s because a very good thing. Another way to clean the waves Blast Then tornado (tornado-explosion longer). Use meteors for batteries too, if it's big. Explosion of Defeat (QNAS) - Oh, boy. Repositioning, disarming, disabling, nuclear warhead. The initial game is used as a nuclear bomb. Later, I use it to disarm your shipping and forging a cataclysm. Learn the elevation time of level 3, 5 and 7 quas. Use a lobby for this, it's easy. Tornado emp icewall can outweal a bkb, unless the PA thinks it can fight literally 0 mana. Use it in safety if needed. The knockback is undervalued. Try beating as many heroes as you can with him. "A global lagoon girl." How? The friend puts it on. Initial game, use it very cautiously. It's too sister. In 99% of cases, I don't use it without stunning. Make sure you see the map a lot, though. Identify the clues of killing well before and pan window when the heroes portraits approach. The cataclysm is Unbelievable. There are two games: A) Cata has settings. B) No settings. In (B) games, use it for scout or in the middle of a fight to cause havoc. These two seconds of random movement may be enough for your ally to survive. The settings may include fans stun. I once won a game where my fan stunned QoP at the end of the game and she died for pick-finger (she was SUPER cultivated). We did this three times (she died for a hundred each time) and eventually became the game. Watch your tormentors as a hawk at the end of the game! Of course there's a combination of Tornado-Meteor-Cata-Defeating. But the timing is Very difficult and needs to practice. I hope this has been useful and you have thought of at least one feature in a new way! Feel free to ask any questions! I tried to catch the invoker recently (all I really have down till now q/w/ and combinations for features) and I have been trying to find a little comprehensive guide on playing it. I tried looking on YouTube, but it doesn't help like all the guides there are either outdated or in Russian. SOMEONE Do you know any good summoning guide out there that I could use? -Thanks. -Thanks.
