How to change my wallpaper on my android phone

Source: Marc ties / android Central one of the simplest ways to add some charm to the new Android phone is setting a custom background. You can choose from the selection of predefined backgrounds supplied with the phone, use a photo from your gallery or download a fantastic background. Diving in the phone settings allows you to set a custom image for the lock screen and the initial screen together or individually, but the exchanging process in a new wallpaper of the home screen is simple, no matter which phone or boot Which is used. Changing the wallpaper on a pixel or on a pixel or Android Android by changing the background is mostly the same as all the Android phones, but some slight differences depend on the phone that makes it easy to remember and easy to perform. When upgrading to a new Android device. Tap and hold the main screen. Touch styles and wallpapers from the drop-down menu. Choose from the collections of wallpapers included with the phone or from third-party applications. Source: Android Central Touch the background you want to use. Adjust the positioning and size and then touch Set. Wallpaper in the lower right corner of the screen. Choose if you want to set the background for the home screen, the lock screen or the locking screen of the house and block. Source: Android Central Change your wallpaper on a Samsung Device Changing the wallpaper on a Samsung device is slightly different from the detailed method above. This is because Samsung offers you some options more than most other phones. Touch and hold onto the home screen. Tap the backgrounds icon in the lower left corner. Select your new background from the list of my Samsung wallpapers, choose from your photo gallery or opt for other options in exploring multiple backgrounds. Source: Android Central Once the background is selected, choose if you want to set the wallpaper for the home screen, the lock screen or the home lock screen and the lock screen set as a background to confirm. Source: Android Central Note: This method works with Samsung devices running Android 10.0 with a UI 2 and above. Change the background with Nova Launcher and Launcher action Most phones use this method to change the phone wallpaper. This makes it easy to remember and easy to do, when upgrading to a new Android device. Tap and hold the main screen. Tap the wallpapers icon at the bottom left of the screen. Choose from the collections of wallpapers included with the phone or from third-party applications. Source: Android Central Tap Set Wallpaper on the upper left corner of the screen. Choose if you want to set the wallpaper for the home screen, the lock screen or the locking screen of the house and the block. Source: Android Central Need help to find a new background? Source: Android Central Android Auto is a convenient way to drivers to add more functionality to the dashboard of your car, like Maps and the integration of Google Assistant, provided that the vehicle supports a USB or Bluetooth connection to your phone. With the recent update to version 6.1, Auto Android users can now finally set up a wallpaper that is behind the application icons on the main boot program. For now, this function remains a server-side thrust, which means that even the latest version of the app does not guarantee that you will be able to change your wallpaper, but fortunately once you are able to do it. A " An easy process: Start Android car on your car's dashboard. Open the settings app. Browse the list and e Choose the background. Touch one of the 15 preset backgrounds to apply it immediately to your launcher. At the moment it is not possible to set a custom background; Instead, you are limited to one of the 15 options provided within Android Auto. Presumably, this is to prevent too busy wallpapers that could obscure the App shortcuts or distract drivers, but fortunately the wallpapers provided seem beautiful with a generally minimalist and mostly mute aesthetic color. How do you use Car Android? You don't need one of the best Android phones around like pixel 5 to drive more intelligently. In fact, you can use almost all modern Android phone to power your car on your car. In fact, your car is much more likely that causes your phone's compatibility problems, since you need a relatively new car with a spacious dashboard. Worst scenario in cases, you can even start Android cars as a standalone app on your phone, even if the experience will not be the same thing. An incredible phone for most of the only dashboard the pixel 5 is not just a large platform for Android car, it's a perfect phone for software enthusiasts and shutter insects in the same way. Get Android 11 with first-line access to new outputs as they come and some of the best cameras you can insert in your pocket. The battery life all day does not hurt. This name occurs occasionally if you connect other devices to the device. A simple thing you can do to avoid confusion is to change the name of your device. A common situation where the name of your device could enter the game is Bluetooth connections. You have to connect the phone to your computer and when the nearby devices are scanned, the Android name is displayed. If more people in your home they have the same device, this can be confused. It is fast and easy to change the name of your device. First, scroll down from the top of the screen (once or twice depending on the phone or tablet manufacturer) to open the notification tone, then tap the gear icon to open the Settings menu. Next, scroll down and select " "phone. Depending on the device, you may have to go to "System" before seeing the section " "About". Find the option "Device Name" and simply touch it. Alternatively, look for a change button. Finally, enter the new name for your Android phone or tablet and touch "OK" or "OK" or "Aven." "It's as simple as the one. The names of the devices don't come into Many situations, but it can still be useful to give your own specific name. We hope this will help to clarify any confusion when connecting devices. Most phones: Settings> Ringtone> Phone ringtone. Choose the tone and press ok or save. samsung: Settings> Sounds and vibrations> Ringtone. Choose your ringtone and press the rear arrow. This article explains how to set the ringtone on a variety of Android phones as well as download new ringtones and transfer them to your phone. The instructions of followed up to no matter who has made your phone android: Samsung, Google, Huawei, Xiaomi, etc. depending on the model of the Android phone you have, you can choose between different stock ringtones. Here's how to find and browse them throughOf them: Open the phone settings app. Touch the sound. Audio settings contain all types of options to adjust the different levels and i volume on the device. These vary slightly based on your device and version of Android that is running, but they should all be quite similar. Find the phone ringtone option and select it. Depending on the version of Android you are using, the phone's ringer option may be under the advanced section. If it's so, it touches the arrow down to open it. From here, see a list of ringtones or a list of ringtone categories available on your device. You can touch a ringtone once to hear what it sounds. When you find one you want to use as your yours Ringer, tap OK or Save to save the selection. If you have a Samsung device, the process for setting a ringtone is a bit different. Here's how to do it: start the settings app, then touches sounds and vibrations. Find the ringtone in the list and touch. Choose the ringtone you want to set up for your phone. Finally, it touches the rear arrow at the bottom of the screen to set your new ringtone. You can tap the Home button to close the settings app. The simplest and least expensive way to get new ringtones is to transfer them from your computer. Most Android devices can use regular music files as ringtones. While a lot of devices accept other formats, sticking to MP3 and Ogg is generally a good idea. Connect your Android device to your computer via a USB cable. Usually, you can use the cable that is part of the charger. On your Android device, scroll down from the top of the screen to see your notifications. You should see a notification of the system by stating that the device is connected via USB for charging. Touch that notification. A new dialog box opens and allows you to choose what the USB is used. Choose file transfer. Your computer could automatically open a window that shows the phone memory. If you do it, go to step 6. If the computer does not come automatically on the phone storage space, open Windows Explorer or which file browser is available on the system. Switch to where the device is mounted. This is the same position that your PC displays the connected USB units. On Windows, it's this PC. In the internal memory of the Android device, find and open the ringtones folder. Copy any music file you want to use as ringtones in this folder. When you return to the audio settings of the phone, you should find them listed among the predefined system ringtones. If the predefined phone ringtones do not offer the level of customization you want, go to Google Play and do a quick search for ringtones. Search results includes many ... some paid and some free. Here are two free apps worth considering: make your phone a conversation starter with free ringtones in the Zedge app. Also includes notification sounds, apps icons, alarms and free wallpapers. You can download and use a high quality ringtone for each member of your family or for each of your friends. The categories include rock, rap and country, more classic ringtones and sound effects. Assign the ringtones to the individual contacts from inside the app. This app allows you to use up to 30 seconds of a song in the multimedia library and create a ringtone from it. It takes a while to get used to the interface, but once you have made some ringtones, the process is easy and effective. Thank you for letting us know! Tell us because! Because!
