In spite of Shripad Rao's self-nomination as the Peshwa, Ambaji Pant nominates a young Bajirao. To test his spiritual wisdom and knowledge of weaponry, Shripad challenges Bajirao to split a peacock feather with an arrow. Bajirao succeeds and is given the title of Peshwa. Ten years later, his wife Kashibai is visited by her widowed friend Bhanu, whose husband was accused of spying and was ordered to be executed by Bajirao. She predicts that just as she longs for her husband, Kashibai will yearn for Bajirao. While traveling to Sironja, an emissary from Bundelkhand enters Bajirao's tent and demands his help to fight invaders. She reveals herself to be Mastani, the daughter of the Hindu Rajput king Chhatrasal and his Persian Muslim consort Ruhani Bai. Impressed by her skills as a warrior, Bajirao assists her with his army and defeats the invaders. Chhatrasal is overjoyed and insists Bajirao spend Holi with them in Bundelkhand. Mastani and Bajirao fall in love with each other and he gives her his dagger, unaware it is a symbol of marriage among the Bundelkhand Rajputs. Bajirao departs for Pune, where Kashibai greets him with a tour of their newly-built Shaniwar Wada and shows him the Aaina Mahal (hall of mirrors), which allows her to see him from her room.ScreenShots:Download Bajirao Mastani (2015) Hindi Movie 720p [1.2GB]Download LinksDownload Brothers (2015) Hindi Movie 1080p [2.4GB]Download Links 1080p and 1080i - one letter, big argument When is HD not HD? It's a question that is causing huge discussion after a controversial Sony blog talked about 1080i support for 'nearly HD'

sets. Currently, to qualify as HD in the UK, sets must be 720p or 1080i, with so-called Full HD or True HD sets having 1080p.HD BurnoutSo when Burnout Paradise designer Simon Phipps wrote on the Sony blog: "Plus heaps more, including: 1080i support for PlayStation 3 owners with "almost HD" sets", it sparked something of a reaction. "Really appreciate the 1080i support, but calling 1080i TVs "almost HD" is a real dumb move- just because you don't like it doesn't make it a real HD res. My 1080i CRT tv will blow the doors off 75% of the LCDs out there in the picture quality department," posted one commentator.Telly warsThat said, the HDTV specification is 1080i or 720p — BOTH are full high definition. BY DEFINITION. Neither is "not quite HD". I love my 1080i CRT HDTV compared to almost every 720p LCD screen I've ever seen and anyone else who owns one can probably tell you the same. Do some research before venting next time — 1080i IS HD. Real HD. The HDness. Completely HD..." posted another.Are we beginning to see an HD telly class war - with the Full HD crowd smugly grinning at the poor old HD Ready lot?It's certainly prompted a bit of a debate.
